SITE NAME Sloan Landfill		STREET ADDRESS Route 16110	
CITY Strattanville	STATE PA	ZIP 16258	COUNTY Clarion

## SUMMARY:

The site is a residential lot, approximately three acres in size, that contains a two-acre dump site. The area north and west of the residential lot was used during the 1960s to dispose municipal and industrial waste from Owens-Illinois.

## RECOMMENDED ACTION

☐ Further Investigative Action Needed

\_\_\_ Site Reconnaissance

\_\_\_ Screening Site Investigation

\_\_\_ Listing Site Investigation

\_\_\_ HRS

\_\_\_ Other (specify) \_\_\_\_\_

☒ No Further Action Needed at This Time Due to

\_\_\_ No evidence of hazardous waste

☒ Will be addressed by other program or agency  
(explain in "Comments")

☒ HRS score would be below cutoff value  
(explain in "Comments")

\_\_\_ HRS score would be above cutoff value but no  
further action recommended (explain in "Comments")

\_\_\_ Other (specify) \_\_\_\_\_

## COMMENTS:

- \* The site won't score due to lack of an observed release to ground water and surface water.
- \* Mark Gorman of Meadville DER office is aware of the site. (Phone conversation between Maria Malave and Mark Gorman on March 29, 1989).
- \* Due to the fact that the levels of contaminants in the soil ~~do not~~ not grant an emergency response, as Dawn Ioven (EPA toxicologist) has indicated, the site has been referred to the State.

**SITE SUMMARY:**

The site is a residential lot, approximately three acres in size, that contains a two-acre dump site. The area north and west of the residential lot was used during the 1960s to dispose municipal and industrial waste from Owens-Illinois.

**REASON FOR REFERRAL:**

Analytical results of samples taken on this property on July 7, 1987 by NUS FIT 3, EPA's contractor, revealed levels of antimony in on site soil samples above the upper range for non-polluted soils (i.e., up to 232 mg/kg). It also showed one hint of high arsenic concentration (i.e., 236 mg/kg).

Since the levels of contaminants found on site does not warranted an emergency, as Dawn Ioven, EPA's toxicologist has indicated, we are referring this site to the State attention.
